

Abhilash

FullStack Developer with hands-on experience building responsive, scalable web apps using the MERN stack. Strong grasp of clean code, UI/UX, version control, and agile workflows. Eager to take on full-time roles that enhance technical and problem-solving skills.

Work Experience

Wanderlust – A travel website

March 2025 - May 2025

- Built a full-stack accommodation booking platform inspired by Airbnb.
- Implemented authentication, listings, search filters, and responsive UI.
- Used MongoDB for database operations and REST APIs for CRUD operations.

Tool Wear Prediction System

Mar 2025 - May 2025

- Developed a machine learning-based web app to predict tool wear using actual machining data.
- Integrated ML models like Linear Regression and Random Forest with user input..
- Used Streamlit for building the UI and deployed the app online.
